

## About the Contribution of Lunin B.V. in the Research of Legacy of Avicenna

**Doctor of Historical Sciences A.Gafuruv  
Bukhara State University**

Each jubilee, undoubtedly, makes a certain contribution to the study of life and creative works Abu Ali Ibn Sino (Avicenna). The impending jubilee festivities and scientific theoretic conference is not an exception. It is quite naturally that at this conference the reports containing new information about undiscovered verges of activity of a great thinker will be represented. It is considered necessary to attract the attention of young researchers to an important work by Lunin, published in .....(4 1979. 39-67) mentioned article is called ..... (1918-1978) and was dedicated to the 1000<sup>th</sup> anniversary of the medieval genius. Being an extraordinary specialist to the sphere of history ography Lunin made the fullest list of published works about the scientist, written during 60 years in the former Soviet Union. This list enumerates scientific works of outstanding scholars in alphabet order, these scholars studied creative works of Ibn Sino. The considered bibliographic index can be divided into several independent lists. As above mentioned work comprises publications on many spheres such as philosophy, natural sciences, ethics, aesthetics, music, geometry, algebra and others, it is important to mention the selection of the works of investigators of creative works at Ibn Sino in the sphere of medicine. It is necessary to refresh in the memory of scientific workers of older generation and attract the attention of younger generation investigators to the present publication. It is an important source of data about investigators of creative legacy of the great scholar.
